Letter

From Our Regular Correspondents

From C. A. Snow & Co. "PATENTS." Washington, D. C., Feb. 26, 1910.

What is everybody's business is nobody's business, and everybody's business is the government of the United States. Most men have enough to do with the government of their families sometimes assisted by recalcitrant wives and children, but if they are public-spirited, they may turn their attention to village or county affairs, and even know something about the affairs of their state, whether it be Texas or Rhode Island. But when it comes to national and international affairs, not one voter in ten is or tries to be well informed. Nevertheless, this voter has his say in the most delicate, multifarious and momentous of national affairs. It is a wonderful system, without having much system about it, and one wonders how long it will last, or what will be the result of the evolution in popular government.

President Taft is advocating a naval program calling for the building of two immense battle-ships of the 25 thousand ton class each year until the Panama Canal shall be finished. This means ten battleships of the heaviest tonnage and guns. He desired to carry out the Roosevelt "Big Stick" policy under the impression that the best safeguard against war is to be fully armed for it. The Panama Canal, it is calculated, will be completed in 1915, and it is urged that after its completion the naval program can be reduced, for then instead of sending fleets around Cape Horn for the protection of our Pacific border, they can be sent through the Canal and loaded at several depots of our own enroute. It is thought that Congress will make an appropriation for the two ships a year program.

There is a continuous discussion in Congress with reference to ship subsidies. The American carrying trade sixty years ago covered all seas, and the Stars and Stripes could be seen in every port in the world. The flag at present is confined exclusively to our interior and coast trade. Two years ago when our battle-ships circumnavigated the globe, they were supplied with provisions and coal by foreign vessels. Ex-Secretary of the Treasury Leslie Shaw has recently made the startling announcement that Japan is determined to rule the Pacific or tinge its waves with blood, and he has added to this statement details as to how Japan can do it. He says that we hired twenty-seven foreign ships to carry supplies for our around the world

battle-ships, and that one hostile shot from any country that owns a cannon would under international law have sent every one of these twenty-seven ships home, for no country can afford quarrels. He further stated in 1909 the War Department hired over forty foreign ships to do its work, and that we are sending food to the soldiers in the Philippine Islands in Japanese ships. He stated further that Japan can put two hundred thousand soldiers in Hawaii in thirty days without firing a shot, and that it would take us two years to put one hundred thousand there. The Ex-Secretary of the Treasury has a happy faculty of graphic statement and illustration, and his combination of arithmetic and rhetoric produce a vivid, impressive and true picture. For better or worse, we to have its flag involved in our and a part of the international system. This has been brought about through our Hawaii and our Philippines. The secure insularity once afforded us by the two great oceans is no longer ours. We must be able to defend our frontiers, Hawaii in mid Pacific and the Philippines in Asiatic waters. We cannot do this without soldiers and ships, not only war-ships, but colliers and commissary ships. How nations can build ships and employ sailors for half the price that we must pay. As Mr. Shaw says, "These are not state secrets. Every body knows them except our voters. We are building battle ships, and this is well, but battle-ships without colliers and transports are absolutely worthless. In case of war we could not get our Atlantic fleet to San Francisco. No vessel in the fleet can carry enough coal to take it there. We have no colliers, and could then hire none." Ex-Secretary Shaw further stated that every powder-mill in the United States was to make powder twenty-four hours per day for thirty days, the product would last our present Navy only two hours.

OBITUARY

On Feb. 25, 1910 Mr. Jesse J. Bruton passed this life to the great beyond at 10:30 o'clock. He was born May 30th, 1882 near Whetstone in Wright County Mo. He leaves a wife, little son, and mother, two sisters, one brother and many relatives and friend to mourn his loss, we trust their loss is his eternal gain. He was laid to rest in the Thomas Cemetery. Funeral services was rendered by Rev. Holland.

His body was laid in silent rest,
By friends so kind and true;
Of Heaven's broad plains he is a guest,
He has no more suffering on earth to do

The wife weeps o'er the vacant chair,
The son must fare her loss;
The mother too must sorrow share,
Brother and sister count this world but dross.
